High Table Table

Design Mats Aldén

The High table is the latest addition to High swivel chair. The table is designed with sleek proportions and a smooth, sioo-treated oak surface that complements the seating in the series. The tabletop is supported by a metal column that attaches to the floor or bolts to an outdoor surface. The column is equipped with integrated power points for recharging digital devices and other electrical items. The table's robust, multi-functional design and all-weather power points create big potentials for use in outdoor settings.

Can be treated with Protega Novatherm fire protection, which is a waterborne fire protection paint, for products which, for example, will be placed in connection with escape routes and entrances.

Can be treated with fire protection

Dimensions and weight

Height: 72 cm / 112 cm

Ø: 88 cm

Pillar table: Weight: 30 kg.

Stand table: Weight: 32,5 kg.

Product numbers and combinations

U11-59/BORD High Table, attachable pillar table

U11-59/STA High Table, attachable stand table

B11-05 Additional fee for choice of non-standard wood

B11-06 Additional fee for choice of non-standard colour

Append to product number

WOOD AND FINISH

EK for oiled oak.

SIOO for sioo:x treatment oak.

CU for cumaru.

METAL SURFACE FINISH

GR for grey 2150 Sablé on steel.

V for white RAL 9010.

LG for light green RAL 160 70.

C for any colour on steel, for a start up fee.

VARIANTS

Can be treated with fire protection, at additional cost.

For fire protection treatment contact Nola.

INSTALLATION TYPE

N for surface mount.

M for in-ground.

Standard colours

Materials and surface treatments

Powder coated steel in RAL grey Gris 2150 Sablé, white RAL 9010 or light green 160 70 10.

Piled oak, Sioo-treated oak or Cumaru wood on the table top.

Cumaru

Cumaru is sometimes called Brazilian Teak and is a hard and durable type of wood. The wood changes in a red/brown shade and does not need surface treatment thanks to its natural properties. Over the years Cumaru ages in a beautiful silver gray tone.

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

SiOO:X treatment

Sioo:x is a wood protection with environmentally friendly silicon technology. Water-based and biocide-free. We use Sioo mainly for our oak furniture. Sioo:x treatment is suitable for all woods, outside as well as inside, and gives a light surface without pigments. The surface is UV-resistant, water-repellent and non-stick. Active and preventive action against algae, mould and pests. Also rot-proof, wood-strengthening and fire-retardant. This wood protection provides long durability and easy maintenance.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

In-ground

Cast in ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Partly assembled.

The table is supplied prepared for electric outlets. Power sockets supplied separately and must be fitted by a qualified electrician. Secure outlet, IP44, to have outdoors. The socket has a self-closing lid and comes with a seal kit.

Maintenance

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

SiOO:X treatment oak

Sioo:x-treated products are treated twice upon delivery; once with a wood protection (Premium Träskydd Altan) and once with a surface protection (Premium Ytskydd Altan). Directly after a product has been installed, it should be treated once more with Sioo:x Premium Surface Protection Altan for best durability. After that, every 12 months. The surface protection forms a wear surface, which means that products that are exposed to severe mechanical wear may need to be treated more often than every ten years. The surface treatment has a tested effect according to the standards EN 46 and EN 113.

For information about the Sioo treatment see the website www.sioox.se.

Cumaru

Cumaru shifts in a reddish shade and does not need any maintenance thanks to its natural properties. Over the years Cumaru ages into a beautiful silver gray tone.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
