

Solaris Planter

Design Almén Gest Design

This multi-faceted planter is a striking geometric form that uses light and shadow to highlight its angled surfaces. Crafted in powder-coated sheet steel, the planter is lightweight and strong, and provides a striking complement to architectural settings. Solaris' sleek shape provides a potent contrast to organic shapes.

Materials and surface treatments

Solaris Planter is made of steel and pre-treated with iron phosphating before being surface treated with a thermosetting modified epoxy powder, providing a very smooth levelling and substrate wetting, excellent corrosion protection and adhesion with the topcoat. The planter is then powder coated.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Fully assembled.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
