## Kalmarsund Armchair

Design Lars Gunnars

This robust armchair is made for use in gardens, parks and alongside urban streets. Part of the Kalmarsund furniture suite, the armchair's contemporary shape and sleek profile suit a wide variety of outdoor settings. Placed together, two armchairs create an attractive pair of seats, or can be grouped around a table with several others to form a seating arrangement or dining area. The armchair complements the Kalmarsund benches, which are available in two- or three-seater versions, wall-mounted or freestanding. The armchair's seat, backrest and frame are available in a variety of colours, making it easy to coordinate with a design scheme. The armrests for the armchair and Backed bench are now extended for increased accessibility.

### CERTIFICATION

BEDÖMNINGEN

## Dimensions and weight

Width: 61 cm  
Height: 84 cm  
Armrest height: 67 cm  
Sitting height: 46 cm  
Depth: 57 cm  
Vikt: 32 kg

### Individual dimensions

Wood components: Seat and backrest: 30 mm x 95 mm and 30 mm x 120 mm  
Back steel/undercarriage: 50 x 12 mm  
Armrest: 50 x 20 x 2mm  
Diameter of legs: 48 mm x 3.2 mm  
Wall bracket: 50 mm x 10 mm

## Product numbers and combinations

U11-26 Kalmarsund armchair ground-mounted  
U11-27 Kalmarsund armchair attachable version  
B11-06 Starting cost for powder coating of steel in a color other than standard. Choose an RAL color  
B11-07 Starting cost for another color of wood. Choose brown or grey for Linax or an NCS color for painted wood. If you want the same color on both steel and wood, choose the RAL color for both.

### Append to product number

#### WOOD AND FINISH

EK for oiled oak.

TEA for oiled teak.

A for coated pine, light green NCS S 6010-G10Y, stand dark green RAL 6012.

G for coated pine, stand black RAL9005.

H for coated pine, maroon NCS S 4550-Y80R, stand black RAL 9005.

C for coated pine any color, starting cost is added.

#### METAL SURFACE FINISH

RAL 9005

C for any color other than standard, at additional cost.

#### INSTALLATION TYPE

N for surface mount.

M for in-ground.

V for mounted to wall.

## Standard colours

RAL 9005

RAL 6012

NCS S 6010-G10Y (Grön)

NCS S 4550-Y80R (Röd)

## Materials and surface treatments

### **Pine**

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

### **Teak - FSC-certified**

FSC-labeled teak is exceptionally durable in an outdoor environment. Teak has a high content of silicon and tannic acids, which makes it quite expensive to process. If you want to keep the reddish-brown luster, you should oil the wood several times during a season, otherwise it turns gray quickly.

### **Oak**

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

### **Water-based glaze**

Varnishing of wood is done with a water-based varnish. A water-based paint that is kinder to the environment. Under normal use, the paint has a good wear resistance and long durability.

### **Wood oil**

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

### **Steel**

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

### **Electrogalvanized**

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

### **Powder coating**

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

## **Assembly and placement**

### **In-ground**

Cast in ground.

### **Surface mount**

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

### **Mounted to wall**

Bolted in place to stand/wall bracket.

Bolts for walls not included.

Seat and back fully assembled. Legs are delivered separately.

## Maintenance

### Water-based glazed pine

Products in varnished pine must be maintained regularly with alkyd paint. Maintenance intervals approximately 1 time per year. Damage and cracks should be repaired immediately. Touch-up paints in spray packaging are available in standard colors to order.

### Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

### Oiled teak

Teak should be oiled annually to maintain the brown color. Without maintenance, teak takes on a silver gray color over time.

### Powdercoated steel

Products that are electro-galvanized and powder-coated can be touch-up painted with alkyd paint.
