

nola®

Alta Furniture series

Design Andreas Klippinge

Alta is a steel and wood lounge furniture series designed for both outdoor and indoor settings. The series embodies simplicity, inclusiveness, and versatility. With its soft, pillow-like wooden details, Alta exudes an inviting ambiance. Alta offers flexibility and comfort for both solitary relaxation and cozy togetherness with someone special.

What sets Alta apart, as the name suggests, is the ability to elevate (altitude) the furniture by adding perforated screens to the back or sides. This can create a more private atmosphere, allowing users to enjoy the sensation of sitting in the warm spring sun without needing a building to lean against.

Dimensions and weight

Alta Sofa

U20-30A Alta Sofa

Width: 175 cm

Height: 87 cm

Depth: 73 cm

Armrest height: 68 cm

Seat height: 45 cm

Weight: 84 kg

U20-30AB Alta Sofa with rear screen

Width: 175 cm

Height: 130 cm

Depth: 78 cm

Armrest height: 68 cm

Seat height: 45 cm

Weight: 102 kg

U20-30ABHV Alta Sofa with back screen and screen on the sides

Width: 186 cm

Height: 130 cm

Depth: 78 cm

Armrest height: 68 cm

Seat height: 45 cm

Weight: 117 kg

Alta Stool

Width: 87,5 cm

Height: 45 cm

Depth: 72,5 cm

Alta Armchair

U20-32A Alta Armchair

Width: 88 cm

Height: 87 cm

Depth: 73 cm

Armrest height: 68 cm

Seat height: 45 cm

Weight: 50 kg

U20-32AB Alta Armchair with back screen

Width: 88 cm

Height: 130 cm

Depth: 78 cm

Armrest height: 68 cm

Seat height: 45 cm

Weight: 59 kg

U20-32ABHV Alta Armchair with back screen and screen on the sides

Width: 99 cm

Height: 130 cm

Depth: 78 cm

Armrest height: 68 cm
Seat height: 45 cm
Weight: 74 kg

Alta Bench

Width: 175 cm
Height: 45 cm
Depth: 72,5 cm

Product numbers and combinations

U20-30A Alta Sofa, with armrests, without wall

U20-31 Alta Stool, without armrests, without back wall

U20-32A Alta Armchair with armrests, without walls

U20-33 Alta Bench, without armrests, without walls

Append to product number

WOOD AND FINISH

LIN for linax impregnated pine.

E for oiled oak.

HVE for hardwax-oiled oak (only for indoor use).

For outdoor use, choose between oiled oak or linax impregnated pine. For indoor use, choose hardwax-oiled oak.

METAL SURFACE FINISH

RAL 7022

C for any color other than standard, starting cost is added.

VARIANTS

A for armrest.

AB for armchair / sofa with armrests and back wall.

ABHV for armchair / sofa with armrests, back wall and wall on the sides.

INSTALLATION TYPE

N for surface mount.

Standard colours

RAL 7022

Oiled oak

Linax impregnated pine

Materials and surface treatments

Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Linax

Linax is a linseed oil-based impregnation that provides extra long durability in outdoor environments and corresponds to impregnation class AB. The impregnated wood turns gray over time, which means that it should be re-oiled if necessary. Use a linseed-based oil for impregnated materials.

After traditional impregnation according to NTR AB, the wood is boiled in a hot linseed oil with or without color pigments under vacuum. The oil is penetrated into the surface on all six sides, which reduces moisture absorption in the wood and gives a dimensionally stable product over time. The result is a dried product with good resistance to rot that also has long maintenance intervals. Linax-impregnated furniture is intended for outdoor environments only.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Maintenance

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil. Black stains on oiled oak can be removed with oxalic acid.

Linax impregnated pine

Outdoor furniture requires oiling every 5 years and panel products and roofs require oiling every 12 years. Maintenance should be done with linseed oil varnish. It is important that the wood is clean and dry (max. 20% moisture content) before it is finished with oil. When washing, do not use high-pressure cleaners. Washing should be done with lukewarm water and then rinsed off with a water hose at normal pressure. Strong grease-dissolving agents should not be used, but washing should be done with a mild household detergent. Detergents containing bleach should also not be used.

The oil can be applied with a roller or brush. Too much oil can cause growth on the wood and give a sticky surface. Attacks by growth can also occur if the wood has not been sufficiently dry or cleaned before the oil is applied. Growth does not damage the wood and is relatively easy to remove, but has a tendency to return.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Versions

Alta Furniture series with bench, stool, armchair and sofa. Stool and Bench are available both with and without armrests. Armchairs and sofas with armrests are also available with a back wall and/or side walls for screening.

Designers

Andreas Klippinge

Andreas Klippinge, a furniture designer from Småland, specializes in sustainable design for industrial manufacturing in furniture, lighting, and everyday objects. He was educated at Linnaeus University in Växjö, Sweden, where he continues to reside and operate his studio. Andreas' design can be described as typical 'of Småland', with an ability to handle resources with extra care. Alta is his first product for Nola, a steel and wood lounge furniture.
