Blanka Litterbin

Design Blenda Design

The sleek shape of this contemporary litterbin disguises its spacious proportions. Made with an inner container that pulls outward to empty, removing litter and replacing the waste bags couldn't be easier. Blanka is the perfect complement to areas where the Blenda bollard and bicycle stand have been installed, as both products were created by the same designers.

CERTIFICATION

Dimensions and weight

Width: 49,7 cm

Height: 87,7 cm

Depth: 22 cm

Vikt: 73 kg

Volume: 80 L

Individual dimensions

Lid in 8 mm stainless steel

Body in electro-galvanized and powder-coated steel 2,5 mm

Product numbers and combinations

Ö30-65 Blanka litter bin, green RAL 6017, concrete base included.

METAL SURFACE FINISH

RAL 6017

C for any color other than standard, starting cost is added.

Standard colours

RAL 6017

Materials and surface treatments

The litterbin is made from 2.5 mm steel powdercoated in standard colour green RAL 6017.

The lid is made from 8 mm stainless steel.

The base is made from cast concrete.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Stainless steel

Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.

Zinc powder primer

It's a thermosetting epoxy powder coating primer that can be applied on several type of metal substrates such as aluminium, steel or galvanised steel. This primer has a robust curing window, allowing excellent inter coat adhesion in direct fired ovens and gives very good edge coverage and superior corrosion protection.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Fully assembled.

Maintenance

Powdercoated steel

Products that are electro-galvanized and powder-coated can be touch-up painted with alkyd paint.

Character

Designed by landscape architects, Blanka was made to suit a wide range of indoor and outdoor settings. The inner container pulls outward to empty, making it easy to remove litter and replace the plastic bag.

Designers

Blenda Design

Blenda is a designstudio based in Gothenburg, committed to designing furniture for public spaces. With design that works towards both interiors and urban exteriors, they have participated in many projects in the recent years. The products can be found across Sweden, for example in Stavanger Cultural Center, Museum of Modern Art in Stockholm, Arlanda Airport and Gothenburg City library. The studio is run by landscape architect Katarina Gunnarsson and Ingemar Holmlid.
