Centrum Litterbin

Design

As its name suggests, Centrum is an efficient litterbin/ashtray combination intended to stand in the centre. Attached to a freestanding base, the litterbin can be placed directly in the flow of human traffic. Whether placed in the midst of things or mounted discreetly to a wall, the litterbin's gleaming metal rim is easy to spot from a distance. Centrum provides separate fireproof receptacles for rubbish and cigarette ends.

Dimensions and weight

LD89050 Rectangular litterbin: Width: 43 cm. Height: 54 cm. Volume: 45 L. Weight: 11.8 kg.

LD89010 Ashtray with smoking grate: Width: 15 cm. Height: 25 cm. Depth: 12 cm.

LD89013 Ashtray with lid: Width: 15 cm. Height: 25 cm. Depth: 12 cm.

Round version (Ö16-45): Height: 44.5 cm Diameter: 32 cm Volume: 18 L. Weight: 13 kg.

LD89020 Rectangular litterbin: Width: 36.5 cm. Height: 42.5 cm. Depth: 34.6 cm. Internal dimensions: Width: 25.6 cm. Height: 36 cm. Depth: 22.7 cm. Volume: 21 L. Weight: 7.8 kg.

LD88960 Stand: Temporary/attachable. Height: 80 cm. Footplate dimensions: 40 x 50 cm. Holes for fixing to the ground on request.

LD88950 Stand fixed to the ground. Height above ground: 80 cm. Cast 40 cm into the ground.

Standard colours

Materials and surface treatments

RECTANGULAR VERSION

The inner container is made from zinc-electroplated sheet steel with a thickness of 1.25 mm or 1.5 mm. The outer casing is made from 1.25 mm stainless steel sheet.

ROUND VERSION

The inner container is made from stainless steel sheet with a depth of 1.25 mm. The outer casing is made from stainless steel sheet with a depth of 2.5 mm. The frame is zinc-electroplated and powder-coated in standard colour black RAL.

ASHTRAY

The inner container is made from 1 mm black-painted, zinc-electroplated sheet steel, The outer casing is made from stainless steel sheet with a depth of 1.25 mm.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Stainless steel

Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.

Hot-dip galvanized

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Mounted to wall

Bolted in place to stand/wall bracket.

Bolts for walls not included.

Fully assembled.

Wall-mounted or attached to a free-standing post.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
