Cube Planter

Design Nola

The Cube planter is an efficient concrete design made to complement contemporary architecture. The planter's substantial size is large enough to contain trees, making it possible to restore plant life to urban areas covered in concrete. The planter may be used to create pedestrian barriers or restrict vehicle access. Cube can enhance a building's appearance by making space for plant life in an urban setting.

Dimensions and weight

Length: 120 cm
 Width: 120 cm
 Height: 120 cm
 Vikt: 1860 kg

Product numbers and combinations

Ö16-37G Planteringskärl Cube, ljusgrå.
 Ö16-37A Planteringskärl Cube, antracitgrå.
 Ö16-37BV Bevattningstank Cube 25L
 Ö16-06BT42 Bevattningstank till liten Stensjökruka och Cube 35L

Append to product number

VARIANTS

A for anthracite gray colored concrete

Standard colours

-  Infärgad antracitgrå betong
-  Ljust grå betong ofärgad

Materials and surface treatments

The planter is made from reinforced concrete.

Concrete

Concrete is cement mixed with crushed stone or aggregate. The material is very strong in compression but fragile in tension. To compensate for this concrete can be reinforced, often with steel.

Coloured concrete

Colored concrete is concrete in a color other than standard grey. Pigment is added to the dry mixture, which means that the concrete becomes coloured throughout. Each color has its own recipe.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Assembled.

Maintenance

Concrete

Both normal concrete and fibre-reinforced concrete are sensitive to hard edge impacts. A concrete product that has been damaged can be repaired with polyester filler, such as the product "Plastic Padding".

Coloured concrete

Products made of coloured concrete are washed with a pressure sprayer at low pressure. Damaged products can be repaired with a repair kit that is available to order.

Versions

Available in a natural concrete finish or in anthracite-coloured concrete.

Character

Cube is large enough to grow trees in, making it possible to incorporate plant life into urban architecture.
