Cylinder Litterbin

Design

Cylinder is a stable bin with a clamping ring to hide and keep the sack in place. The design makes the trash can easy to empty.

Dimensions and weight

Litterbin

Height: 47.5 cm

Diameter Ø: 34 cm

Weight: 10 kg

Volume: 35 L

Dog latrine

Height: 50 cm

Diameter Ø: 36 cm

Weight: 15 kg

Volume: 50 L

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Hot-dip galvanized

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Mounting on a post or against a wall, alternatively freestanding including post and concrete base.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
