

nola®

Haga Furniture Group

Design Anders Nyquist

Considered to be an all-time classic, the Haga family brings a timeless outdoor style to gardens, parks and residential landscapes. Haga is well-suited to historic settings, yet complements contemporary spaces too. The bench is available in different lengths, providing several sizes to suit a range of outdoor settings. The bench and armchair are made with higher seats and robust armrests to provide stability for those who may be less able.

Dimensions and weight

Rectangular table

Length: 150 cm

Width: 80 cm

Height: 73 cm

Weight: 20 kg/ 24 kg

Armchair

Width: 62 cm

Depth: 50 cm

Height of back: 96 cm

Height of seat: 45 cm

Weight: 15 kg

Haga park bench

Length: 130/171 alt 226 cm

Height: 96 cm

Armrest height: 67,5 cm

Sitting height: 44 cm

Depth: 61 cm

Length: 171 / 130 / 226 cm

Width: 50 cm

Height: 45 / 95 cm

Weight: 35 / 25 / 45 kg

The oiled oak version is made in

heights of 45 / 91 cm and

weighs 38 / 27 / 49 kg

C for any color other than standard, starting cost is added.

INSTALLATION TYPE

N for surface mount.

Standard colours

Materials and surface treatments

The products are made in either yellow-glazed pine or alkyd oil enamelled white oak. The oak is oiled.

Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Water-based glaze

Varnishing of wood is done with a water-based varnish. A water-based paint that is kinder to the environment. Under normal use, the paint has a good wear resistance and long durability.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Delivered in prefabricated parts that attach with screws, bolts and brackets. The products are freestanding. To attach them to the ground, please use the ground-mounting fixings for Haga in stainless steel, product code U16-55, one set of four pieces.

This information can be found on each product's page; please see tables, chairs and benches.

Maintenance

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil. Black stains on oiled oak can be removed with oxalic acid.

Water-based glazed pine

Products in varnished pine must be maintained regularly with alkyd paint. Maintenance intervals approximately 1 time per year. Damage and cracks should be repaired immediately. Touch-up paints in spray packaging are available in standard colors to order.
