

Jern Park Bench

Design Joel Karlsson, Krook & Tjäder Design

Traditional carpentry and modern craftsmanship come together to form this contemporary park bench. The seat height and armrests are optimised for individuals who may be less able, providing extra stability when sitting down and rising to their feet again. Made for use outside and indoors, the bench can be bolted directly to the ground. Conceived as a modular design, Jern can be made in a range of lengths and sizes.

CERTIFICATION

 Designed for accessibility

 Can be treated with fire protection

Dimensions and weight

Length: 235 cm
 Height: 83.2 cm
 Armrest height: 72 cm
 Sitting height: 47.5 cm
 Sitting depth: 44.9 cm
 Depth: 56.9 cm
 Vikt: 73,5 kg

The 235 cm version provides a base model that can be extended in length.

Product numbers and combinations

U20-20 Jern park bench 235 cm (base section, can be extended if required)
U20-20 /PÅBYGG Jern park bench extended section
B11-05 Additional fee for choosing a non-standard wood
B11-06 Startup cost for powder coating steel in a color other than standard.
 Choose a RAL colour.

Append to product number

WOOD AND FINISH

ACC for accoya.

If you want a different material in the seat than Accoya®, contact us at Nola.

METAL SURFACE FINISH

C for any color other than standard, starting cost is added.

INSTALLATION TYPE

N for surface mount.

Standard colours

 RAL 3009

Materials and surface treatments

Powder-coated steel

Seat in Accoya®

Standard colour: Red Oxide: RAL 3009

Non-standard colors are available at an extra cost.

The product can be produced in other types of wood, please contact Nola for details.

Accoya

Accoya® wood is the result of more than 80 years of research and development into modifying wood through an acetylation process. Accoya® wood is Radiata pine, a fast-growing wood virtually free of knots that is harvested from renewable FSC-certified forests. Accoya® wood has properties that match or exceed those of tropical woods and the treatment process is non-toxic. The pale wood will turn grey over time and may develop dark spots over time. Accoya® can withstand humid and rainy environments very well and expands/contracts less than other tropical-type woods.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Jern is delivered assembled. The extended version is formed by several parts that bridge two base modules to form the longer length.

Maintenance

Accoya

Accoya is maintenance-free and does not require any special treatment to preserve its unique properties. If black spots should appear on the wood from pollution in the air, these are easily removed with any kind of furniture wash.

Powdercoated steel

Products that are electro-galvanized and powder-coated can be touch-up painted with alkyd paint.
