

Jonathan Bench

Design Bellitalia

The bench Jonathan invites both play and relaxation with its creative and futuristic design. Taking inspiration from a seagull's wing, it's aptly named Jonathan, drawn from Richard Bach's short story about the seagull Jonathan Livingston. The bench features a monolithic seat that supports an additional form, which can serve as a back rest, table, or even a higher seating platform. Anchored in place, this construction ensures exceptional stability and durability.

Materials and surface treatments

Concrete

Concrete is cement mixed with crushed stone or aggregate. The material is very strong in compression but fragile in tension. To compensate for this concrete can be reinforced, often with steel.

Coloured concrete

Colored concrete is concrete in a color other than standard grey. Pigment is added to the dry mixture, which means that the concrete becomes coloured throughout. Each color has its own recipe.

Maintenance

Concrete

Both normal concrete and fibre-reinforced concrete are sensitive to hard edge impacts. A concrete product that has been damaged can be repaired with polyester filler, such as the product "Plastic Padding".

Coloured concrete

Products made of coloured concrete are washed with a pressure sprayer at low pressure. Damaged products can be repaired with a repair kit that is available to order.
