Kaskad Chair

Design Björn Dahlström

Inspired by raging rivers breaking over rocks, the Kaskad chair captures the movement of water surging over rapids. Crafted from ribbons of curved steel attached to a contouring frame, the chair's fluid form and flowing lines articulate the shapes of contemporary art more than they speak the language of industrial design. Lightweight and stackable, the chair flexes similarly to a sprung frame to provide added comfort. The chair belongs to the Kaskad furniture group, which includes a table and an armchair.

CERTIFICATION

Dimensions and weight

Width: 63 cm
 Height: 81 cm
 Sitting height: 46 cm
 Depth: 58 cm
 Weight 7 kg

Individual dimensions

Bent steel wire: Ø 6 and Ø 10 mm

Product numbers and combinations

U11-80 Kaskad chair, powder-coated in fine structure paint, fitted with floor protectors

U11-83 Kaskad seat cushion for chair in black

B11-06 Startup cost for powder coating steel in a color other than standard

U11-86 Stainless steel fasteners, powder-coated

Append to product number

METAL SURFACE FINISH

Powder coated in fine structure.

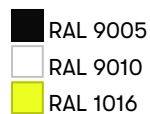

S for black RAL 9005.

V for white RAL 9010.

G for yellow RAL 1016.

C for any color of steel, at an additional cost.

Standard colours

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
