Korg Bar Stool

Design Thomas Bernstrand

The newest addition to the Korg series is the Bar stool and high table, further completing the collection. Sitting at a higher level is increasingly requested in public and outdoor spaces, often suited for work, social gatherings, or events. With this high-seating option, the entire Korg series can be incorporated to create a streamlined and cohesive design, adding both functionality and a confident sense of style.

Dimensions and weight

Width: 52 cm
Height: 98 cm
Sitting height: 75 cm
Depth: 52 cm
Weight 15 kg

Red/Orange RAL 2002 (matt clear coat), fine texture.

Green RAL 6025, fine texture.

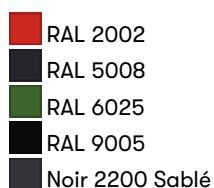

Black RAL 9005, fine texture.

C for any color other than standard, at additional cost.

VARIANTS

Korg Bar stool is only available in a attachable option.

Standard colours

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
