Korg Furniture Series

Design Thomas Bernstrand

Korg Furniture series is neat, expressive wire furniture anchored in a cylinder-shaped base. Its grid pattern creates a clear graphic expression. The furniture series includes a park bench, armchair, swing sofa and table. New in the series are the Bar stool and Bar table. Korg is also available as a furniture system and can be assembled into a flexible building system in different variations, with possibilities to create longer units or independent seats. This flexibility makes Korg an adaptable system for a variety of projects and environments.

Korg is maintenance-free and the durable material allows water to drain easily, making it particularly suitable for public places.

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
