

Memory Memorial Marker

Design Løvetanna Landskap

Memory is a decorative memorial marker that provides space for 96 stainless steel nameplates. The design was created especially for memorial groves. The frame is bordered by a decorative motif that trails along one side and across the top. The frame is complemented by an optional base that attaches to create a low plinth at the bottom. Memory is part of a series of designs, including a version for cemeteries, a freestanding water standpipe frame and a decorative holder for gardening tools. Each item is available in a variety of colours.

Dimensions and weight

Memorial plaque: Height above ground: 195 cm Total height: 226 cm. Length: 153 cm. Depth: 94 cm. Weight: 165 kg.

Tool holder: Height above ground: 146 cm Total height: 177 cm. Length: 82 cm. Depth: 20 cm.

Water tap: Height above ground: 118 cm Total height: 149 cm. Length: 48 cm. Depth: 40 cm.

Product numbers and combinations

U05-11 Memory commemorative plaque, complete, including bench/shelf, Board with 96 plaques

U05-11-118 Plaques in stainless steel A4 quality, set of 10

B11-06 Startup cost for powder coating steel in a color other than standard. Choose a RAL colour.

Append to product number

METAL SURFACE FINISH

C for any color other than standard, starting cost is added.

INSTALLATION TYPE

M for in-ground.

Standard colours

■ RAL 5008

Materials and surface treatments

Stainless steel

Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Assembly and placement

In-ground

Cast in ground.

Levereras i delar för slutmontage på plats.

Maintenance

Powdercoated steel

Products that are electro-galvanized and powder-coated can be touch-up painted with alkyd paint.
