Repeat Litterbin

Design Björn Dahlström

Repeat is a spacious litterbin with the capacity to sort waste items for recycling. Made for both indoor and outdoor use, the opening for litter is placed discreetly in the side. The front panel is simple and straightforward, and painted in a single colour to create a sleek look. The single-sided version is made with several openings and a sloping roof. The double-sided version is designed with two openings, space for two rubbish bags inside and doors on both sides.

CERTIFICATION

C for any color other than standard, starting cost is added.

INSTALLATION TYPE

N for surface mount.

Standard colours

- RAL 6009
- RAL 2009
- Noir 2200 Sablé

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Delivered fully mounted.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
