

Sala backe – New Product! Pavilion

Design Tengbom

Sala backe Pavilion is a sculptural and architectural structure, designed to create a sense of safety and presence. Like an illusion of greenery, the pavilion offers leafy shade through a tactile pattern, perforated into its roof and walls. It provides both shelter and transparency—a place where you feel seen but not exposed.

Made of steel, the pavilion is built to withstand weather and wear while offering great freedom in shape and colour. Its archetypal form and perforated pattern are inspired by Swedish Folkhem architecture. A nostalgic aesthetic that pays tribute to the legacy of Anders Diös, the developer whose influence still shapes this part of Uppsala where the idea for the pavilion was first born.

With its distinctive character, Sala backe Pavilion acts as a placemaking element in the urban landscape, a small landmark that invites rest, presence and brief pauses.

Dimensions and weight

Length: 300 cm

Width: 300 cm

Height: 350 cm

Weight 890 kg

Weight of wall plate: 100 kg / pc

Product numbers and combinations

Ö82-10 Salabacke Pavilion

Append to product number

METAL SURFACE FINISH

C for any RAL color other than standard, starting cost added.

Standard colours

RAL 260-M

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Designers

Tengbom

Tengbom, established in 1906, is today one of the world's oldest and leading architecture firms in the Nordics.

With expertise spanning from interior design to urban planning, we shape communities, redefine boundaries, and make the world a better place.

Tengbom Product Design has collaborated for decades with prominent Swedish and international producers, creating high-quality, sustainable designs across a wide spectrum. Our design process always begins with identified needs. Aesthetic appeal, functionality, materiality, manufacturing techniques, and sustainability are challenged and developed. By understanding end-user requirements and gaining insight into both hard and soft values, we deliver innovative and timeless products for today and tomorrow.
