Product info

U13-05

Verve Rocking Chair

Weight: 22.5 kg

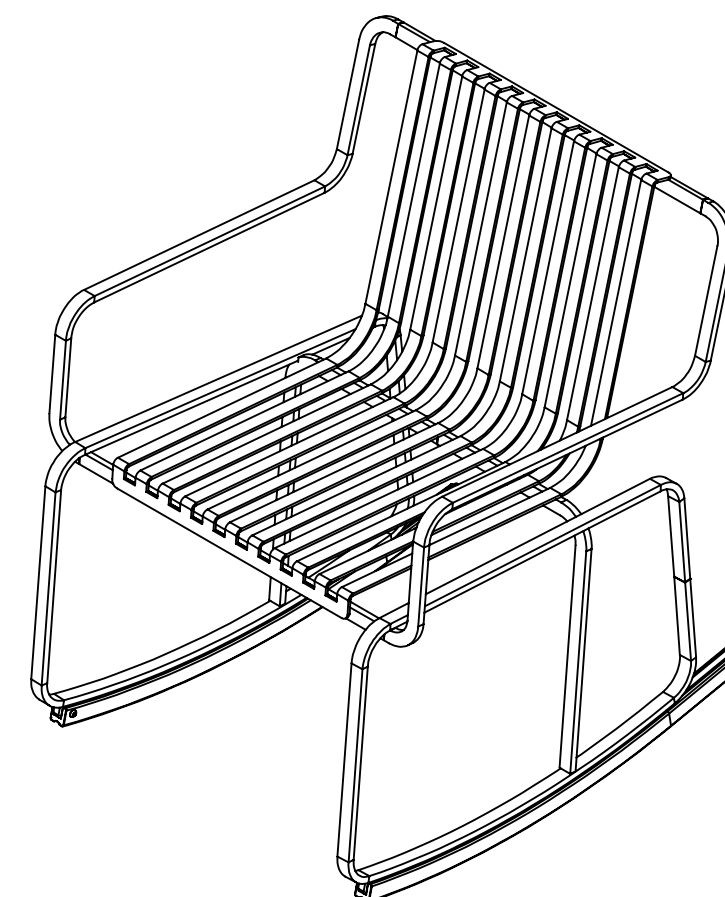

Delivered fully assembled

Material: Hot-dip galvanized steel

Products that are hot-dipped only may be touch-up painted using so-called "cold galvanizing" spray.

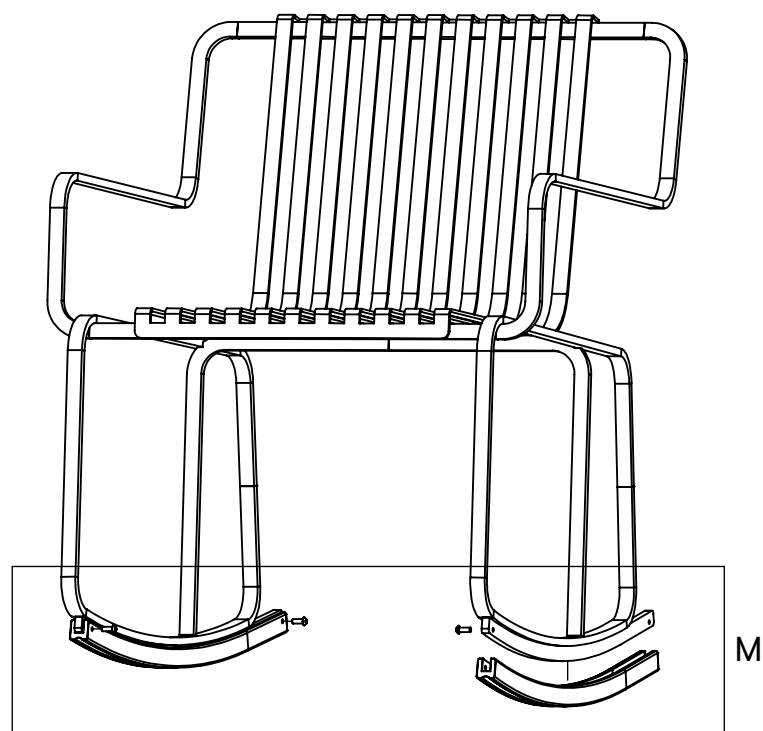

The furniture includes rubber guards on the runners to protect delicate floor surfaces.

Rubber material: Ethylene Propylene Rubber (EPDM), 70°

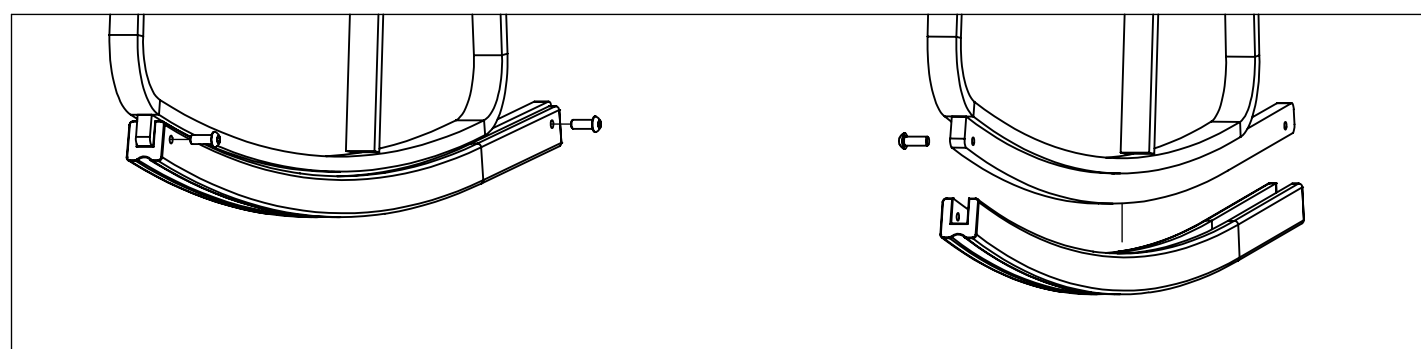

Verve Gungstol

Rubber guards

Verve Rocking Chair is supplied with rubber guards mounted on the runners. These are intended to protect the floor surface. If the chair is to be used outdoors, or if the rubber guards for any other reason need to be removed, this can easily be done by unscrewing the four M6 bolts and removing the guards.
