The Korg furniture system can be configured in many different combinations. Above is an example assembly.

If closed configurations with multiple curves are to be built, the matching dimensions on the left can be applied.

The seat height of the sofa and the bench is the same regardless of the type of legs. The freestanding leg has adjustable feet for both the sofa and the bench.

Ground-mounted legs: U12-32MC-BEN och U12-37MC-BEN

Dig a hole in the ground with a diameter of approximately 40 cm. Dig to frost-free depth.

Fill the bottom with frost-resistant material so that the total depth of the hole is about 40 cm.

Position the furniture with the leg placed in the dug hole. Brace it both vertically and horizontally. The pipe forming the front edge of the seat should be approximately 44 cm above the finished ground level.

Cast the leg in place with concrete. The concrete should not reach all the way to the ground surface but should stop about 5 cm below it.

Refill the hole and restore the ground surface.

Attachable legs: U12-32NC-BEN och U12-37NC-BEN

The attachable model has a perforated base plate for mounting with M10 bolts.

Mounting on wooden surfaces

Mount using coach screws into the wooden substrate.

Mounting on cobblestones or paving slabs

Underpour the slabs with concrete.

There must be no bedding sand between the slabs and the concrete. Drill through the concrete and slab for expansion bolts or chemical anchors.

Mounting on concrete, stone blocks, etc.

Mount using chemical anchors or expansion bolts.

Mounting with expansion bolts provides a detachable installation.
